

ASCB 2017 Exhibitors

Booth Number:417 - 3i Intelligent Imaging Innovations

3i designs and manufactures technologies for live-cell and intravital fluorescence microscopy including digital holography, spinning disk confocal, multi-photon and lightsheet. SlideBook software manages everything from instrument control to image capture, processing and data analysis.

Booth Number:608 - 89 NORTH

<http://www.89north.com>
cbaumann@89north.com

89 North specializes in imaging products and solutions with the highest possible price to performance ratio. Our latest product, the LDI, offers 7, high-power laser lines for the price of a standard LED light engine and is perfect for spinning disc confocal microscopy, photoactivation, optogenetics, TIRF, and structured illumination applications.

Booth Number:700 - AAAS

Science, published by AAAS, is the world's leading weekly general scientific journal. Science features peer-reviewed original research articles as well as news and policy. The Science family of journals includes Science Signaling, Science Translational Medicine, Science Immunology, Science Robotics and Science Advances. For more information visit <http://sciencemag.org/>

Booth Number:510 - ACEA Biosciences, Inc.

ACEA Biosciences, Inc. provides high performance, affordable flow cytometers, and real-time cell analysis instrumentation for efficient monitoring of cell-based assays. ACEA's xCELLigence® and NovoCyte® systems are used in pre-clinical drug discovery and development, toxicity, safety pharmacology, and basic academic research.

Booth Number:611 - Alere Technologies AS

Axis-Shield will display a range of Density Gradient Media for the isolation of cells, subcellular membranes, organelles, viruses and macromolecules using centrifugation techniques.

Booth Number:541 - Allen Institute for Cell Science

Launched with a contribution from Paul G. Allen in 2014, the Allen Institute for Cell Science studies the cell as an integrated system. The Institute will produce novel visual, dynamic, predictive models of the cell that will accelerate cell biology and biomedical research.

Booth Number:443 - ALVEOLE

Alvéole develops innovative tools for controlling the cell microenvironment. As it has become essential to control the behaviour and development of living cells in culture, Alvéole presents PRIMO, a new photopatterning device that enables biologists to create protein patterns for cell-based assays that are essential for their research work.

Booth Number: - American Society for Cell Biology

The ASCB Booth is your one-stop shop for all things ASCB. Browse our selection of popular t-shirts and merchandise, talk to ASCB staff about all the benefits and programs the organization offers, and find out what we can do for you! Educational resources will be available as well.

Booth Number:201 - AMSBIO LLC

AMSBIO is contributing to the acceleration of discovery through the provision of cutting-edge life science products and services for R&D. We are able to provide solutions for studying cell motility, migration, invasion and proliferation. We also offer solutions for organoid and spheroid culture, regenerative medicine and stem cell research.

Booth Number:1005 - Amy Roth Art

Surly-Ramics is handmade ceramic jewelry and art prints created by multimedia artist, Amy Davis Roth.

Booth Number:333 - Analytik Jena (formerly UVP LLC)

Analytik Jena (formerly UVP LLC), manufactures BioImaging Systems Imagers for gels, fluorescent westerns, chemiluminescent blots, multiplex/colorimetric samples. UVP BioDoc-It2 basic gel documentation, ColonyDoc-It Imager counts colonies. AJ US manufactures ultraviolet lamps, PCR hoods, transilluminators, crosslinkers, hybridization ovens. AJ manufactured products: UV/VIS ScanDrop2, thermal cyclers, qPCR/standard PCR systems, DNA/RNA isolation/extraction

Booth Number:408 - Andor Technology

Andor is based in Belfast, Northern Ireland and operates at the high-value end of the global scientific digital camera market. Andor is a global leader in the development and manufacturing of high performance scientific imaging cameras, spectroscopy solutions and microscopy systems to match you application needs in research and OEM.

Booth Number:432 - Applied BioPhysics Inc.

ECIST™ (Electric Cell-Based Impedance Sensing) is a real-time, impedance-based method to study the behavior of cells grown in tissue culture. Assays include TEER, migration, proliferation, signal transduction, cell differentiation, cell toxicity, as well as cell behavior under dynamic flow conditions. The measurement is continuous and label free.

Booth Number:1001 - Artologica

Michele Banks (aka Artologica) is an artist inspired by science. Her watercolor and collage work - based on scientific themes ranging from cell division to global warming - has been shown at the NIH and AAAS and featured in publications including Scientific American and Wired.

Booth Number:433 - ASI/Applied Scientific Instrumentation

ASI manufactures top-of-the-line hardware for sub-micron micropositioning and microscopy applications. Including XYZ stages for ultra-precise sub-micron positioning, stages with piezos for high resolution/speed positioning, autofocus systems, optics & illumination, light sheet microscopes/iSPIM & diSPIM systems and other custom microscope/opto-mechanical systems. We utilize long life components for demanding OEM applications.

Booth Number:220 - Atlas Antibodies AB

Atlas Antibodies is a Swedish manufacturer and supplier of highly characterized antibodies and isotope-labeled mass spectrometry standards targeting all human proteins. Originally developed and validated within the Human Protein Atlas (HPA) project, our 18 thousand antibodies come with a vast quantity of characterization data freely available on the HPA portal.

Booth Number:703 - Aviva Systems Biology, Corp

Aviva Systems Biology Corporation specializes in providing polyclonal and monoclonal antibodies, and ELISA Kits for research needs. Unlike other companies, we design, manufacture and validate our own antibodies. Our head office in San Diego, California provides scientific support assisting researchers with a variety of proteomic objectives.

Booth Number:908 - AZER SCIENTIFIC

Azer Scientific is an industry leader in clinical and research laboratory supplies.

Booth Number:715 - Azure Biosystems

Azure Biosystems is focused on the development and commercialization of state-of-the-art technologies to support research in the life science community. Founded in Dublin, California, Azure Biosystems is developing a series of instruments for image capture and analysis.

Booth Number:733 - Baker

For more than 60 years, Baker has helped advance science, discovery and clinical care by pioneering innovative solutions for air containment, contamination control and controlled environments. Baker and Baker Ruskinn biological safety cabinets, physiological workstations, and other equipment provide unparalleled user and product protection for a variety of applications.

Booth Number:339 - Bertin Corp

Bertin Instruments, through its American office located in DC, offers a diverse product portfolio to scientists and researchers aimed at improving sample processing efficiency, maintaining high reproducibility between sample sets, and generating high quality data output.

Discover more about our homogenizers and cell imaging system at <http://www.bertin-instruments.com/industry/life-sciences/>

Booth Number:314 - Bio-Techne

Bio-Techne combines the best-in-class products and services from R&D Systems, Tocris Bioscience, and Boston Biochem to allow us to become better strategic partners with researchers. We manufacture over 95% of our bioactive proteins, application-qualified antibodies, Quantikine ELISAs, Luminex Assays, small molecules or Ubiquitin related products. We are Bio-Techne.

Booth Number:301 - Biocytogen, LLC

BIOCYTOGEN was established in 2008, providing the fastest gene targeting services of mouse, rat and cell line using CRISPR/Cas9 and pure C57BL/6 ES cell platforms. We provide 100% money back guarantee because of our >99% success rate. Our customers cover more than 200 prestigious universities, institutes and pharmaceutical companies.

Booth Number:330 - BioLegend

BioLegend develops and manufactures world-class, cutting-edge antibodies and reagents at an outstanding value. The broad product portfolio includes flow cytometry, cell biology, and functional reagents for research in immunology, neuroscience, cancer, and stem cells. Custom services include assay development, sample testing, and conjugation.

Booth Number:726 - BIOMEDTECH LABORATORIES

Booth Number:217 - Biopeptek Pharmaceuticals, LLC

Booth Number:727 - Bioss Inc

Bioss Inc is a leading antibody developer whose mission is to develop and manufacture top quality antibodies that accelerate biological research and discovery.

Booth Number:224 - BioTechniques

BioTechniques, the international journal of life science methods, provides open access to first-quality, peer-reviewed papers on laboratory techniques and protocols. Now in its 61st volume, BioTechniques has over 80,000 print subscribers worldwide. The journal augments its peer-reviewed content with feature articles and topic-specific supplements. Visit www.biotechniques.com for more details.

Booth Number:515 - BioTek Instruments, Inc.

BioTek instrumentation is used to aid in the advancement of life science research, facilitate the drug discovery process and to enable cost-effective quantification of disease relevant molecules in the clinic. BioTek® is a global leader in the design, manufacture, and sale of instrumentation and software.

Booth Number:410 - Bitplane, Inc.

Bitplane, an Oxford Instruments Company provides Imaris - the world's leading image visualization, analysis and interpretation software for 3D/4D microscopy data. Imaris is particularly useful for cell biologists as it provides tools for: cell detection along with volume, shape and intensity measurements, tracking cells or organelles and cell lineage tracing.

Booth Number:814 - Boster Biological Technology

Boster Immunoleader have developed and validated a wide range of high quality immunological reagents,more than 5000 research publications have cited Boster products. Our reagents are optimized for WB, IHC, ELISA, and a variety of other applications in cancer, developmental biology, neuroscience, immunology, and more.

Booth Number: - Bruker Corporation

Bruker provides a wide range of fluorescence microscopy systems for advanced life science applications. The new Opterra II swept-field microscope is the next generation confocal for live-cell applications. The Vutara super-resolution system features the fastest single-molecule localization (SML) capabilities available for deep live-cell investigation.

Booth Number:423 - Carl Zeiss Microscopy, LLC

As the world's only manufacturer of light, X-ray and electron/ion microscopes, ZEISS offers tailor-made microscope systems for 3D imaging in biomedical research, life sciences and healthcare. A well-trained sales force, an extensive support infrastructure and a responsive service team enable customers to use their ZEISS microscopes to their full potential.

Booth Number:648 - Caron Products & Services, Inc.

Booth Number:917 - Cell Press

<http://www.cell.com>

jeckilson@cell.com

Cell Press (booth #228) is the home for cell biologists, offering high-quality, cutting-edge cell biology research and resources to propel your work forward. We publish 14 primary research journals including Cell, the Trends reviews journals including Trends in Cell Biology, and four research journals on behalf of learned societies.

Booth Number:605 - Cell Signaling Technology

CST is a private, family-owned company, founded by scientists and dedicated to providing high quality research tools to the biomedical research community. Our employees operate worldwide from our U.S. headquarters in Massachusetts, and our offices in the Netherlands, China, and Japan.

Booth Number:601 - Collecta, Inc.

Collecta provides HT loss-of-function genetic screening services for the discovery and functional characterization of novel therapeutic targets. We offer pooled lentiviral shRNA and CRISPR libraries, pooled library screening and analysis by NGS, targeted RNA-Seq for biomarker discovery, lentiviral reagents, and stable cDNA, shRNA, and CRISPR constructs and cell lines.

Booth Number:447 - Celsee Diagnostics

Booth Number:239 - Cepham Life Sciences, Inc.

Booth Number:424 - Chemglass Life Sciences

Chemglass Life Sciences is a woman owned business. We offer life science industry solutions including; spinners and magnetic stirrers, cell culture bags, bioreactors, microbial culture flasks, bench equipment, rollers, rockers, PCR accessories, spectrophotometers, incubators, plastic ware, reusable glassware, ovens, refrigerators, freezers and racks, disposable flasks, shake flasks, and vials.

Booth Number:509 - Chroma Technology Corporation

<http://www.chroma.com>

sales@chroma.com

Chroma Technology designs and manufactures optical interference filters using advanced sputtering technologies. Our high performance filters are intended for imaging applications ranging from widefield and confocal fluorescence microscopy, TIRF and super-resolution techniques to flow cytometry, high content screening, multi-photon and Raman spectroscopy. Chroma also provides comprehensive technical and applications support.

Booth Number:609 - ChromoTek GmbH

Immunoprecipitation of GFP-, RFP-, Myc-, GST- and MBP-fusion proteins: Nano-Traps®

Super Resolution Microscopy: Nano-Boosters

Protein-protein interactions in live cells: F2H®-Assays

Endogenous target visualization in live cells: Chromobodies®

Booth Number:716 - Cloud-Clone Corp

Cloud-clone Corp. is a biotechnology company. Our products cover from genes to proteins, include cDNA libraries, Primers, Proteins and DNA Marker, Natural and Recombinant proteins, Monoclonal and Polyclonal antibodies, Target gene clone Kits, ELISA and CLIA Kits. We also offer custom-built services to meet our customers' specific needs.

Booth Number:925 - Cold Spring Harbor Laboratory Press

Cold Spring Harbor Laboratory Press is an internationally renowned publisher of books, journals, and electronic media, located on Long Island, New York. Since 1933, it has furthered the advance and spread of scientific knowledge in all areas of genetics and molecular biology, including cancer biology, plant science, bioinformatics, and neurobiology.

Booth Number:310 - CoolLED Ltd

CoolLED designs and manufactures a comprehensive range of cutting edge LED illumination systems for bioscience and clinical microscopy including: •pE-100 series, single wavelength illumination systems. •pE-300white series, broad spectrum illumination. •pE-4000 – the universal LED illumination system for research fluorescence.

Booth Number:702 - Corning Incorporated

Corning Life Sciences offers innovative, high-quality research tools, including solutions for invasion/migration assays, angiogenesis and 3D tumor formation. Corning® spheroid microplates, Corning Matrigel® matrix, Transwell® Permeable Supports, FluoroBlok™ light blocking membrane, Corning® HYPERFlask® vessels, and Corning® CoolCell® products are used in basic to cutting edge research. Visit Corning at #323.

Booth Number:638 - Cosmo Bio Co., Ltd

<http://www.cosmobio.com>
export@cosmobio.co.jp

Here we offer you a wide range of research reagents and research instruments. Many products are being made available outside Japan for the first time.

Cosmo Bio has been supporting and inspiring the Japan life science research community for over 30 years.

Booth Number:718 - Cytoskeleton, Inc.

<http://www.cytoskeleton.com>
brian@cytoskeleton.com

Cytoskeleton, Inc. provides highly active preparations of pure actins, tubulins, motor proteins, small G-proteins, live cell imaging probes, and functional assay kits to study cytoskeletal signal transduction, structure, and function. We also offer custom protein production and compound screening. All products are stringently quality-controlled and available for bulk purchase.

Booth Number:231 - DDNews

<http://www.ddn-news.com>

poorman@ddn-news.com

DDNews is an international news organization reporting trends and developments impacting the business of Pharma, Biopharma and Life Science researchers from the bench to the boardroom. From a single business news publication, DDNews has grown to twelve print and online news vehicles. Free subscriptions at <http://online.icnfull.com/orp/>

Booth Number:327 - DeNovix Inc.

DeNovix Inc. develops, manufactures and sells laboratory equipment for life science applications. Our stand-alone instruments include 1 μ L UV-Vis Spectrophotometers, Fluorometers and the DS-11 FX+ with 1 μ L UV-Vis, cuvette UV-Vis and Fluorescence combined. Instruments include an Android HD touchscreen interface and built-in Wi-Fi, Ethernet and USB.

Booth Number:300 - Drummond Scientific

Drummond will be introducing their newest microinjector, the Nanoject 3. Stop by our booth to see the new features and capabilities offered in the new model. See the new electronics and the increased injection capabilities. Visit our booth to see the unit in action.

Booth Number:738 - DRVision Technologies LLC

DRVision, maker of SVCCell, is changing the way researchers do image analysis. With analysis recipes powered by our machine learning-based image recognition technology, users have everything they need in SVCCell to detect, track, measure, and classify objects in microscopy image sequences, no image processing expertise needed.

Booth Number:816 - ECHO LABORATORIES**Booth Number:311 - Electron Microscopy Sciences**

Electron microscopy sciences will have on display their complete line of accessories, chemicals, supplies and equipment for all fields of microscopy, biological research and general laboratory requirements. As well as our full line of tools, tweezers and dissecting equipment

Booth Number: - ELSEVIER

<http://www.elsevier.com>

jeckilson@cell.com

Cell Press (booth #917) is the home for cell biologists, offering high-quality, cutting-edge cell biology research and resources to propel your work forward. We publish 16 primary research journals including Cell, the Trends reviews journals including Trends in Cell Biology, and eight research journals on behalf of learned societies.

Booth Number:529 - EMBO

SourceData, an initiative by EMBO, is an open platform making it easier to discover research data published inside scientific manuscripts. SmartFigures from the SourceData suite of tools allow searches for data and their relation, thus facilitating literature search. The SmartFigures Lab is launched in partnership with Wiley and EMBOPress.

Booth Number:133 - Enzo Life Sciences, Inc

Booth Number:438 - Essen BioScience

The IncuCyte® Real-Time Quantitative Live-Cell Analysis System, designed by Essen BioScience, Inc., is the first system to enable quantification of cell behavior over time by automatically gathering and analyzing images around the clock within a standard incubator. The IncuCyte® System provides insight into active biological processes in real-time.

Booth Number:641 - FASEB - Society Management Services

As the nation's largest coalition of biomedical researchers, FASEB represents 27 scientific societies, over 125,000 researchers, and is recognized as the policy voice of life science researchers. Join us at our Science Research Conferences – a series of intimate, interdisciplinary conferences that explore new approaches in research undergoing rapid scientific advances.

Booth Number:205 - Fibercell Systems, Inc.

FiberCell Systems supplies hollow fiber bioreactors for easy cell culture scale-up with 100X productivity. Applications include antibody and protein production, endothelial cell culture, stem cell culture and exosome production. CDM HD is a chemically defined serum replacement optimized for hollow fiber cell culture. A better way to grow cells.

Booth Number:318 - Finger Lakes Instrumentation LLC

High Speed Filter Wheels (23 msec change time) and MicroLine cooled CCD cameras. For life science applications the FLI series of high speed filter wheels are the fastest and most dependable filter wheels among all commercial filter wheels on the market.

Booth Number:804 - Flarebio Biotech LLC

Flarebio is a biotech that develops, manufactures and sells high quality products including recombinant proteins, antibodies and ELISA kits. We also offer customized service to meet individual's specific needs. Our mission is to accelerate research and discovery in biomedical research.

Booth Number:704 - Flexcell International Corporation

Flexcell International specializes in products to apply mechanical load, (tension, compression, and fluid shear), to cells in monolayer and 3D culture... specifically, equipment and consumables for creating environments to stretch cells in monolayer as well creating and stretching 3D cell-seeded constructs. Flexcell offers microscopy devices for viewing real-time response.

Booth Number:233 - Focus Biomolecules

Booth Number:927 - Frontiers

Frontiers is a community-rooted open-access publisher. Established by scientists in 2007, Frontiers drives innovations in peer review, post-publication review, research networking and a growing ecosystem of open-science tools. The "Frontiers in" journal series has published 49,000 peer-reviewed articles across 57 journals and more than 440 academic specialties.

Booth Number:219 - FUNAKOSHI COMPANY, LTD

Funakoshi Co., Ltd distributes research reagents and instruments for researchers in the life science fields since its foundation. Our mission is to provide products to broad range of customers throughout our world.

Booth Number:413 - Garland Science

Please visit us at Booth 1216 to examine the new Sixth Edition of Molecular Biology of the Cell and the Fourth Edition of Essential Cell Biology, both by Alberts et al. Also, browse our other publications such as The Biology of Cancer by Robert A. Weinberg.

Booth Number:225 - GE Healthcare

<http://www.gelifesciences.com>
caroline.pritchard@ge.com

GE Healthcare provides expertise and tools for a wide range of applications, including basic research of cells and proteins, drug discovery research, and tools to support large-scale manufacturing of biopharmaceuticals. By combining our knowledge, talent, and resources, we deliver innovative products and solutions that help our customers achieve their goals.

Booth Number:701 - Gene Tools, LLC

Gene Tools manufactures Morpholino oligos for blocking translation, modifying splicing or inhibiting miRNA activity. Morpholinos are used in cell cultures, embryos or, as Vivo-Morpholinos, in adult animals. Morpholinos are effective, specific, stable and non-toxic. Backed by Ph.D.-level customer support, Gene Tools designs and synthesizes Morpholinos and offers cytosolic delivery options.

Booth Number:542 - GeneCopoeia, Inc.

GeneCopoeia products include largest collection of ready-to-express clones for ORF cDNA, shRNA, promoters, microRNA precursors, inhibitors and microRNA 3' UTR targets; lentiviral clones, packaging kits and pre-made lentivirus; recombinant proteins and antibodies; qPCR products and Genome editing (CRISPR, TALEN/TALE-TF) tools.

Booth Number:709 - Genetic Engineering & Biotechnology News

Genetic Engineering and Biotechnology News (GEN) is the longest-running, most widely read, and largest circulated global biotechnology news publication. Published 21 times a year and recently redesigned to focus on Biobusiness, OMICS, Drug Discovery, Bioprocessing, and Translational Medicine, GEN reports on key news developments and technology trends in the bioindustry.

Booth Number:830 - GenScript USA Inc.

<http://www.genscript.com>
joanna.xie@genscript.com

GenScript is a leading biotech company providing life science services and products to scientists over 100 countries worldwide. With gene, peptide, protein, antibody and preclinical drug development service capabilities, we are recognized as a leading biotech company specializing in fundamental life sciences research, translational biomedical research, and early stage pharmaceutical development.

Booth Number: - Getson + Schatz PC

Brian Getson's immigration law firm often provides a money-back guarantee to scientific researchers qualified for EB-1/NIW green cards. Major scientific organizations have invited Mr. Getson to speak, including the American Society for Cell Biology and the American Chemical Society, in addition to the Wistar Institute. Visit us at researchergreencard.com

Booth Number: - GORYO Chemical, Inc.

GORYO CHEMICAL, INC. provides novel fluorescent probes for cellular analysis, assay, and imaging. ProteoGREEN™-gGlu can detect tumor ex-vivo while AcidiFluor™ ORANGE has high S/N ratio in acidic state. Our novel fluorescent probes enable detection of cancer for fluorescent image guided surgery at pre-clinical and clinical trials in JAPAN.

Booth Number:711 - Greiner Bio-One

Setting the industry standard with innovative life science consumables, Greiner Bio-One manufactures for tissue culture, molecular biology, immunology and HTS. Featuring AutoFlask™ for automated cell-culture, Light Protection Tubes for light-sensitive reactions, Shorty Pipettes ideal for benchtop-hoods, ThinCert™ TC inserts for cell modeling, migration/invasion, and µClear®, lumox™, and SensoPlates™ for imaging/HCS.

Booth Number:107 - Hamamatsu Corporation

Hamamatsu Corporation is the North American subsidiary of Hamamatsu Photonics K.K. (Japan), a leading manufacturer of devices for the generation and measurement of infrared, visible, UV light, and x-rays. These devices include sCMOS cameras, EM-CCD cameras, and CCD cameras for microscopy. The company also offers detectors and image sensors.

Booth Number:305 - Horizon Discovery

Horizon combines long scientific heritage in translational research with a precision gene-editing platform incorporating rAAV, CRISPR and ZFN technologies. Horizon supplies genetically-defined cell lines, in vivo models, gene-editing tools and services, custom cell line generation, molecular reference standards, and contract research services to over 1,000 academic, clinical and biopharmaceutical

Booth Number:218 - Human Protein Atlas

The Human Protein Atlas is a freely available database showing spatial distribution of the human proteome in human cells and tissues (www.proteinatlas.org). Now launching the cell-based map of the human proteome, describing the proteomes of the organelles and substructures of the human cell by a large collection of high-resolution images.

Booth Number:930 - HYBRIGENICS SERVICES SAS

We are a complete service provider of cutting-edge technologies dedicated to the study of protein interactions in any research thematic

DISCOVER novel interactions in various tissues/cell types with:

Booth Number:430 - IbiDi USA, Inc

ibidi provides solutions for bio-microscopy. Imaging slides, dishes and plates offer unique solutions for angiogenesis, chemotaxis, wound healing, shear stress assays, immunofluorescence and cell culture. ibidi offers specialized equipment for live cell imaging, including heating, incubation, pump systems for long-term flow assays and O2 monitoring. Unique reagents for live-cell imaging.

Booth Number:302 - iBiology

iBiology (www.ibiology.org) is a growing collection of free online videos by scientists about research, discoveries, and other topics in the life sciences. Visit our booth to learn about our videos and educator resources. This project is funded by NSF and NIGMS and supported by Lasker Foundation, EMBL/EMBO, and UCSF.

Booth Number:546 - IDEX Health & Science

Semrock, a unit of IDEX Health & Science, LLC, manufactures optical filters that set the standard in performance, quality and reliability for the life science, point-of-care, clinical diagnostic, and analytical instrumentation industries. OEMs and end-users benefit from high volume customized optics as well as wide selection of standard catalog products.

Booth Number:304 - Jackson ImmunoResearch Laboratories, Inc.

<http://www.jacksonimmuno.com>
dhersch@jacksonimmuno.com

Specializing in affinity-purified secondary antibodies (many adsorbed against other species) conjugated with Alexa Fluor®, DyLight™, and Cyanine fluorescent dyes; R-PE; and other detection ligands. Other products include anti-IgG, Light Chain specific for Western blotting after IP, Alexa Fluor® 680 and 790 for highly sensitive Western blots. ISO 9001:2008 registered.

Booth Number:800 - Kerafast, Inc.

Kerafast facilitates access to reagents developed by leading laboratories worldwide. Through an online platform, Kerafast provides rapid access to these novel reagents, helping remove traditional barriers to sharing biomaterials among researchers. Kerafast then reinvests in science by returning generous royalty payments to the contributing investigators and their institutions.

Booth Number:238 - KEYENCE CORPORATION

KEYENCE specializes in advanced digital microscopes for both industrial and life science applications. Our BZ-X700 All-in-one Fluorescence Microscope is an inverted, fully-motorized microscope which can be used outside of a darkroom to capture fluorescence, brightfield, and phase-contrast images, allowing researchers to collect better data in a fraction of the time.

Booth Number:202 - Knudra Transgenics

Knudra Transgenics specializes in transgenesis services in *C. elegans* and zebrafish. From our Inject Express service to our premium Full Build service, clients receive products that accelerate their research progress and scientific knowledge. Come see us for advise on how CRISPR, MosSCI, and Tol2 methods will meet your needs!

Booth Number:710 - Kuhner Shaker Inc

This family business, founded in 1949 is the leading developer and manufacturer of shaking machines for the international market. From bench-top shakers to large scale industrial shaker-incubators, Kuhner offers machines of the highest quality. At the same time we aim to cultivate a personal and trusting relationship with our customers.

Booth Number:341 - LABX Media Group

LabX Media Group is a leading provider of timely and essential news, analysis, research, data and insights for members of the research / life science community, and related fields in lab professional services and technology through its two publications – The Scientist and Lab Manager.

Booth Number:731 - LaVision BioTec GmbH

LaVision BioTec develops and manufactures advanced microscopy solutions for research in industry and universities.

Product lines:

TriM Scope, a modular multi-photon microscopy platform for deep, in-vivo imaging. Multiple accessories provide customization.

Booth Number:400 - Leica Microsystems Inc

Leica Microsystems offers infinite possibilities in Cell Biology Research. The Leica DMI8 inverted microscope grows to meet your ever-changing needs for live cell imaging. We will show widefield, confocal, and super-resolution platforms including the Leica TCS SP8 STED 3X.

Booth Number:809 - LifeSensors, Inc.

Booth Number:811 - Lipocalyx GmbH

VIROMER® in vitro transfection reagents are high-tech polymers that facilitate an active escape from the endosome in hard-to-transfect cells such as primary, suspension and stem cells. The new VIROMER® IN VIVIO mRNA Systemic Kit facilitates effective systemic delivery and protein expression in mice and rats.

Booth Number:831 - LONZA Walkersville, Inc

Lonza's BioResearch products and services range from basic research to drug discovery tools. We offer primary cells and media, Nucleofector™ Technology for difficult-to-transfect cells, novel 3D culture methods and live-cell imaging system. Lonza is well recognized for its outstanding scientific support team, and dedication to consistent, high performing products.

Booth Number:802 - Lumencor, Inc.

Lumencor is a leading manufacture of lighting for clinical instruments including microscopes. Unlike traditional lamps, our bright, light engines are energy efficient and mercury free.

Booth Number:719 - Mad City Labs, Inc.

<http://www.madcitylabs.com>

Booth Number:900 - MBL INTERNATIONAL

MBL International provides high-quality products and solutions to advance life science research and clinical diagnostics.

Booth Number:303 - Meiji Techno America Microscopes

MEIJI TECHNO AMERICA is a USA based Japanese manufacturer of OPTICAL MICROSCOPES Specializing in Biological Brightfield, Phase Contrast and Fluorescence Compound Microscopes and Stereo microscopes that are modular and can be configured a hundred ways to fit your specialized applications. Limited Lifetime Warranty and designed in Japan. www.meijitechno.com

Booth Number:603 - Micro-Manager By Open Imaging

<https://open-imaging.com>

info@open-imaging.com

Open Imaging develops, distributes, and provides support services for μ Manager (Micro-Manager), the free and open source optical microscopy image acquisition and device automation software platform. μ Manager supports a wide range of microscopes and peripheral devices, provides an intuitive user interface to run complex experiments, and is highly extensible and customizable.

Booth Number:633 - Mightex Systems

Mightex is a leading developer of advanced illumination sources for cell biology including targeted and wide-field solutions used in microscopy. Featured is the Polygon400 patterned illuminator which enables users to target multiple cells or sub-cellular features with light for applications such as photoactivation, optogenetics, FRAPP and photoconversion.

Booth Number: - MilliporeSigma (formerly EMD Millipore and Sigma-Aldrich)

MilliporeSigma is the U.S. life science business of Merck KGaA, Darmstadt, Germany. With 19,000 employees and 72 manufacturing sites worldwide, MilliporeSigma's portfolio spans more than 300,000 products enabling scientific discovery. The company is committed to solving the toughest problems in life science by collaborating with the global scientific community.

Booth Number:824 - Miltenyi Biotec, Inc

Miltenyi Biotec's mission is to improve scientific understanding and medical progress. We provide products and services that advance biomedical research and cellular therapy. Honoring this mission drives our commitment to support the translation of basic research into therapy in the areas of immunology, cancer, neuroscience and stem cell biology.

Booth Number:803 - Minerva Biolabs Inc

Minerva Biolabs GmbH is a leading biotechnology company for the development and marketing of detection & elimination kits for the control of microbial contamination. Our core competence lies in the control of mycoplasma, bacteria and viruses in cell cultures and biopharmaceuticals.

Booth Number:931 - Molecular Biology of the Cell

MBoC (Molecular Biology of the Cell) MBOC is the journal for the best in cell biology and biomedical research. MBoC publishes important research in all areas of cell biology and life sciences, from biophysics to genetics to neuroscience.

Booth Number:643 - NanoTag Biotechnologies GmbH

NanoTag Biotechnologies is a German company founded in July 2015 by scientists with a strong background in biochemistry as well as quantitative super-resolution imaging.

The main focus of NanoTag Biotechnologies is the development of high-quality camelid single-domain antibodies (sdAbs, also known as Nanobodies) for microscopy and biochemistry applications.

Booth Number:840 - National Science Foundation

The National Science Foundation provides support for a range of topics that are of interest to the memberships of the ASCB. Representatives from the Divisions of Integrative Organismal systems (IOS) and Molecular and Cellular Biosciences (MCB) will be onsite and available for discussions.

Booth Number: - NemaMetrix Inc

NemaMetrix develops and manufactures the ScreenChip System, a screening and phenotyping platform utilizing *C. elegans* as a model organism to acquire and display neuromuscular data in real time. The system allows researchers to get rapid and precise whole animal data via quick and reliable assessment of neuronal and physiological responses.

Booth Number:412 - New England Biolabs

NEB, a leader in the discovery and production of tools for molecular biology, offers a wide selection of reagents for PCR, cloning, expression and purification. In addition to enzymes for DNA work, NEB offers expression systems, enzymes for protein modification, competent cells, and tools for epigenetics research.

Booth Number:215 - Newport Corporation (MKS Instruments)

Newport's Corion Optical Filters and Replicated Optics are key enablers in a wide variety of biomedical instruments including RT-PCR Systems, Cytometers, DNA Analyzers, In-vivo Imagers, Microarray/Microplate Readers, Confocal and Epi-fluorescence microscopes, FTIR spectrometers, and many more. For more information, please visit our website at www.newport.com

Booth Number:401 - Nikon Instruments Inc.

Nikon will debut a new product that will revolutionize the way you image. Also showcasing a high-speed spinning disk confocal with FRAP, flagship A1Rsi Confocal and MP with Enhanced Resolution, N-STORM 4.0 and N-SIM-E Super-Resolution systems, High-Content imaging system, and modular illuminators and flexible laser combiners.

Booth Number: - Okolab SRL

Okolab manufactures superior performance microscope incubators and temperature/humidity/gas controllers. We'll be displaying our new Multi-User Centralized Gas Blender ideal for core facility

Booth Number:525 - Olympus America

Olympus is dedicated to your work, your vision, your science. Through innovation and service, we seek to inspire you to explore new possibilities. Visit us today to view imaging solutions built with the optical excellence and proven application expertise your research depends on. Let us be your partner in discovery.

Booth Number:232 - OPS DIAGNOSTICS, LLC**Booth Number:805 - Origem Biotech Inc****Booth Number:801 - PCO-TECH Inc.**

PCO manufactures high speed and high resolution scientific digital cameras systems using CCD and sCMOS sensors. We are a pioneer in sCMOS development, technology and camera applications. We offer a wide variety of cameras that meet most researcher's needs. Our cameras carry a two year warranty.

Booth Number:530 - PeproTech, Inc.

Since 1988, PeproTech has grown into a global enterprise manufacturing an extensive line of Recombinant Human, Murine and Rat Cytokines, Animal-Free Recombinant Cytokines, Monoclonal Antibodies, Affinity Purified Polyclonal Antibodies, Affinity Purified Biotinylated Polyclonal Antibodies, ELISA Development Kits, Cell Culture Media Products and GMP Cytokines.

Booth Number:325 - Phase Focus Limited

Phasefocus' LiveCyte Kinetic Cytometry system automatically tracks and analyzes the phenotypic and kinetic behavior of individual cells and populations over hours or days and delivers high contrast, high fidelity, artefact free, images that are truly quantitative on the individual cell level without needing labels or high intensity light.

Booth Number:416 - Photometrics

Photometrics is the established leader in the global scientific community for demanding, quantitative bio-research cameras. The original architect of the first scientific-grade EMCCD, and with the release of its Prime Scientific CMOS cameras, the company continues to lead the industry with its state-of-the-art imaging instrumentation and OEM support. Visit www.photometrics.com.

Booth Number:911 - Photonics Media

BioPhotonics is the global resource for research, business and product news and information for the biophotonics community and the industry's only stand-alone print and digital magazine. Stay current with a FREE subscription, and expand your knowledge of light and the life sciences through our extensive, industry-specific archives.

Booth Number: - PI (Physik Instrumente) Piezo Nano Positioning

leading manufacturer of precision motion control equipment, piezo motors, air bearing stages & hexapod parallel-kinematics for semiconductor applications, photonics, bio-nano-technology medical engineering. PI has been developing and manufacturing standard & custom precision products with piezoceramic and electromagnetic drives for 4 decades. PI provides innovative, high-quality solutions for OEM & research.

Booth Number:431 - PIEZOCONCEPT

PIEZOCONCEPT is the leading provider of picometric noise floor nanopositioners dedicated to applications such as Super Resolution Microscopy, Optical Trapping and Atomic Force Microscopy. Our customers include many leading scientists engaged in leading edge research at world class universities and institutes, as well as Nobel prize winners.

Booth Number:904 - Plexense Inc

Plexense, Inc. is a biotechnology company commercializing rapid and highly cost-effective biological assay kits with its proprietary nano technology. Products include quick ELISA kits that deliver results in 15 minutes and protein quantification kits with extended compatibility in all universal buffers. Our assay kits work with conventional spectrophotometers.

Booth Number:915 - PLOS (Public Library of Science)

PLOS (Public Library of Science) is a nonprofit Open Access publisher, innovator and advocacy organization dedicated to accelerating progress in science and medicine by leading a transformation in research communication. The PLOS suite of influential journals contain rigorously peer-reviewed Open Access research articles from all areas of science and medicine.

Booth Number:932 - Proteintech Group Inc.

Proteintech is the original manufacturer of over 12,000 antibodies validated in WB, IHC, IF, IP, siRNA on primary tissues and cell lysates. Whole protein antigens produce antibodies with unparalleled high quality working in more species and applications. Locations (US, Europe, China, Japan), all antibodies in stock, next-day delivery.

Booth Number:317 - QImaging

QImaging designs scientific cameras for life sciences. These affordable digital imaging solutions provide outstanding value, ease of use and reliability, enabling researchers to perform quantitative image analysis and acquire high-resolution images for publication. See QImaging's new application-specific Retiga CCD cameras that were designed specifically for electrophysiology and bioluminescence. Visit www.qimaging.com.

Booth Number:639 - RayBiotech Inc

RayBiotech, Inc. is the pioneer and industry leader of antibody and protein array technologies which allow efficient, cost-effective detection of multiple disease-related proteins from any liquid biological sample. Our technologies hold great promise for the discovery of disease mechanisms, novel biomarkers, and drug targets.

Booth Number:815 - REACTION BIOLOGY CORPORATION

Booth Number:817 - ReZolve Scientific

Booth Number:203 - ROCKLAND IMMUNOCHEMICALS, INC.

Rockland Immunochemicals, Inc. offers each academic, biopharma, and diagnostic professional thousands of antibodies with the aim of providing the right antibody that is the perfect fit for every occasion. With facilities in Pennsylvania for over 50 years, Rockland manufactures products ideally suited for integration into critical assays such as western blotting, immunohistochemistry, immunofluorescence microscopy, ELISA and flow cytometry.

Booth Number:640 - Royal Society Publishing

The Royal Society publishes three journals aimed at cell biologists. Open Biology publishes outstanding open access research and review articles; Philosophical Transactions B publishes topical theme issues; Royal Society Open Science publishes high quality, open access research on the basis of objective peer review. Find out more at booth 235.

Booth Number:629 - RPMC Lasers, Inc.

RPMC Lasers, Inc. offers innovative Diode Pumped Solid-State Lasers and Laser Diode Modules in wavelengths in the IR, visible, and near-UV spectrums with market-leading output power. The DPSS lasers feature a monolithic resonator technology that ensures true single-frequency emission along with excellent power, wavelength, and pointing stability.

Booth Number:826 - Sapphire North America

Sapphire North America is a distributor of novel research tools as well as standard reagents and lab consumables. We offer scientists and purchasing groups in North America a convenient, domestic source for unique products from manufacturers around the world without the complications of international ordering.

Booth Number:732 - Sarstedt, Inc.

Sarstedt provides laboratory consumables and equipment, including supplies for cell culture, PCR, and molecular biology. Our cell culture products are designed with input from our customers for superior cell growth, ease of use, and traceability. Ask for FREE samples of our flasks, dishes, plates and inserts.

Booth Number:819 - SCARF KING

Booth Number:626 - ScienCell Research Laboratories

ScienCell Research Laboratories is an expanding biotechnology company whose mission is the research and development of cell and cell-related products for experimental and therapeutic use. ScienCell provides a variety of high quality normal human and animal cells, cell culture media, reagents, growth supplements, DNA, RNA, and assay kits.

Booth Number:209 - Scientific Industries, Inc.

US producer of benchtop laboratory equipment. Including shakers, mixers, incubators, rockers, rotators, and the world renowned Vortex-Genie. Marketer of Torbal balances and moisture analyzers.

Booth Number:717 - Sino Biological Inc.

Sino Biological Inc. manufactures and provides >100,000 affordable premium-quality reagents: Recombinant Proteins (>5000), Antibodies, Elisa Kits, cDNA clones, Magnetic IP Kit, Transfection Reagents and other Research Tools. It is the largest protein manufacturer in the world and a leading pre-clinical CRO for biologics worldwide. 100% products are made in house.

Booth Number:728 - SMOBIO Technology, Inc

“Small Bio, Smart Tool”, is the motto of SMOBIO. This signifies our commitment to provide the highest quality molecular tools as well as development of the tools required for the bio-industry.

Booth Number:901 - Springer Nature

Nature Publishing Group (NPG) produces scientific information for researchers and the scientifically interested general public. Each month our high-impact journals, open access titles, news, apps, conferences and job listings help over 9 million users to advance their research, reputation, careers and knowledge.

Booth Number:724 - STRESSMARQ BIOSCIENCES INC.

Booth Number:409 - Sutter Instrument Company

<http://www.sutter.com>

alex@sutter.com

Introducing the Lambda 421 beam combiner. A new, patented concept for combining separate light sources with different spectra into a single output beam. Other new products include the DOUBLE IPA® Integrated Patch Amplifier with dual-headstage and comprehensive SutterPatch software, and the highly stable TRIO three-axis manipulator system.

Booth Number:544 - SVI Huygens Software

Huygens software (SVI) is renowned for its excellent deconvolution and noise removal for ALL types of light-microscopy images, such as widefield, STED, and SPIM. Be sure to analyze correctly and apply Huygens GPU-driven deconvolution first. Also available: Colocalization, Object Analysis and Tracking, Stitching, Big data processing, Stabilization, Chromatic Aberration, Cross-Talk.

Booth Number:708 - Sysmex America, Inc

Sysmex America, Inc. is a global leader in hematology diagnostics, offering a diverse portfolio of best-in-class clinical and research laboratory products in the U.S., Canada and Latin America. Sysmex offers innovative, automated solutions in hematology, middleware, flow cytometry and urinalysis. Visit www.sysmex.com/us for more information.

Booth Number:211 - Target Molecule Corp

Booth Number: - Tecan

Tecan is a leading global provider of automated workflow solutions for laboratories in the life sciences sector. Its clients include pharmaceutical and biotechnology companies, university research, forensic and clinical diagnostic laboratories.

Booth Number:938 - TESCANA USA, INC.

Booth Number:508 - The Company of Biologists

The Company of Biologists is a not-for-profit publishing organisation dedicated to supporting and inspiring the biological community through scientific journals, meetings and grants. The Company publishes five specialist peer-reviewed journals: Development, Journal of Cell Science, Journal of Experimental Biology, Disease Models & Mechanisms and Biology Open.

Booth Number: - The Jackson Laboratory

<http://www.jax.org>
careers@jax.org

The Jackson Laboratory is recruiting outstanding Postdoctoral Associates for our expanding research campuses in Bar Harbor, Maine, and Farmington, Conn. Join our team and contribute to our important mission of discovering precise genomic solutions for disease and empowering the global biomedical community in our shared quest to improve human health.

Booth Number:939 - The Rockefeller University Press

<http://www.rupress.org>
lkarl@rockefeller.edu

The Rockefeller University Press is committed to quality and integrity in scientific publishing. Our goal is to publish excellent science using the latest technologies. We carry out rigorous peer review, applying the highest standards of novelty, mechanistic insight, data integrity, and general interest.

Booth Number: - Thermo Fisher Scientific Inc

Thermo Fisher Scientific is the world leader in serving science. Our mission is to enable our customers to make the world healthier, cleaner and safer. Through our Thermo Scientific, Applied Biosystems, and Invitrogen brands, we help customers accelerate innovation and enhance productivity.

Booth Number:705 - TheWell Bioscience Inc

TheWell Bioscience's mission is to develop and commercialize novel cell culture and delivery systems to empower life science research. Our goal is to bridge the in vitro and in vivo studies with simple, versatile products and services to achieve better efficiency by lifting the technical limitations and reducing the cost associated with cell culture research.

Booth Number: - Tokai Hit Co., Ltd.

Next-generation Stage Top Incubator will be introduced at ASCB2015. Our system maintains optimal cell-culture environment for Live-Cell-Imaging on microscope stage. It has high flexibility and performance to keep cells happy on the stage from hours to days. It is widely used under Cooling/Heating, confocal, fluorescence, SIM and TIRF microscopy.

Booth Number:1003 - Trilobite Glassworks**Booth Number:725 - Union Biometrica, Inc.**

Union Biometrica Large Particle Flow Cytometers automate the analysis & dispensing of objects too big/fragile for traditional flow cytometers. Samples include large delicate cells (adipocytes, plant protoplasts), cell clusters (EBs, islets), spheroids (neurospheres, tumorspheres), hydrogel-encapsulated samples, and others. COPAS and BioSorter instruments cover the full 10-1500 μ m size range.

Booth Number:810 - US Bio Corp.

<http://usbiocorp.com/>

Booth Number:808 - US BIOMAX, INC.

<http://www.biomax.us>

Booth Number:839 - Vector Laboratories

U.S. based manufacturer of protein and nucleic acid labeling and detection systems since 1976. We make reagents of the highest quality for immunohistochemistry, immunofluorescence, in situ hybridization, blotting applications, ELISAs, neuronal tracing, glycobiology and flow cytometry. Innovative products include Vectastain ABC Kits, ImmPRESS Polymer Reagents, and VECTASHIELD Mounting Media.

Booth Number:909 - Wiley

Wiley is a global provider of knowledge and knowledge-enabled services in areas of research, professional practice and education. Developing digital education, learning, assessment and certification, partnering with societies, supporting researchers to communicate discoveries. Our digital content, books and 1600 online journals build on a 200 year heritage of quality publishing.

Booth Number:308 - Worthington Biochemical Corporation

Worthington is an ISO9001-Certified primary supplier of Collagenases and other enzymes for primary & stem cell isolation, proteomics, molecular and cell biology research. New! Animal Free Collagenases, CelaseGMP®, STEMxyme® Collagenase/Neutral Protease Blends, new 2017 Catalog and Cell Isolation/Tissue Guide. Take our survey for a chance to win an iPad!

Booth Number:714 - XpressBio

XpressBio manufactures single and multiplex ELISA immunoassays for detection of communicable diseases in mice, rats, guinea pigs, hamsters, rabbits, and non-human primates. We also manufacture unique assays such as Native MPV, Native RPV, Pasteurella, and Helicobacter, as well as several immunoglobulin and HIV research assays and Cytokine ELISA assays.
